

COPPA VIT[®]

COPPER

Many regions in the UK are deficient in essential nutrients required by fast growing ruminants for optimum performance.

A deficiency of cobalt leads to vitamin B12 deficiency and "pine" or unthriftiness. Deficiency of selenium and vitamin E can also cause muscle waisting problems. Lack of copper can cause swayback in lambs whilst deficiency of B1 can lead to cerebo-cortical necrosis (CNN).

ADMINISTRATION: Administer as a drench having first checked the applicator for safety and accuracy. Repeat as required, but at no less than 4-6 week intervals.

Shake well before use. Do not exceed the recommended feeding rate.

Young Lambs	2.5ml
Lambs over 3 months	5ml
Adult Sheep	5ml
Calves	5ml
Growing Cattle	15ml
Adult Cattle	20ml

INGREDIENTS: Aqua, Sodium benzoate, Orthophosphoric acid, Ethoxyquin, Benzyl alcohol.

Analytical Declaration (%w/w)

Ash 2.7%, Fibre 0.3%, Oil 3.2%, Protein 0.6%, Moisture 75%.

CONTENTS PER ML:

Cobalt (as Colbalt sulphate)	10mg
Copper (as Copper sulphate)	7.5mg
Selenium (as Sodium selenate)	0.5mg
Vitamin A	1000iu
